KIT302 Self Evaluation Rating Form – AGILE3 CYCLE

Section 1: Provide a detailed description of the following elements

How much time did you spend on Technical Development tasks? (hours)	……………30+……………………
How much time did you spend on Documentation tasks? (hours)	……………8……………………
How much time did you spend on Self-Directed Learning tasks? (hours)	……………30+……………………
How much time did you spend on the Final Presentation tasks (hours?)	…………………………………

What tasks did you TAKE A LEADING ROLE ON that contributed to the completion of the assignment task? (*Please fully describe your contribution*)

The start and end shift function, user testing, client feedback, Frith reference manual

What other tasks did you CONTRIBUTE to that helped towards the completion of the assignment task? (*Please fully describe your contribution to each task*)

the attempt of conclusion client meeting

What Self-Directed Learning tasks did you undertake that helped towards the completion of the assignment tasks? (*Please fully describe activities*)

I basically learned everything from scratch. Watched a lot of videos and Post online to help with my coding from the Connecting database, how to get data from the database and Insert it into the application, Container, drop-down menu, set buttons, read through RTM, IP issues, etc I spend a lot of time setting up my XAMMP and getting it up and running on my side.

Section 2: Rate yourself on how often you achieved these tasks, over the course of the creating the assignment (using the following scale):

0 = Not at all	1 = Sometimes	2 = Usually	3 = Nearly Always	4 = Always

Criteria	Rate Yourself (0-4)	Provide an explanation of your self-rating
Did I work as hard as I could have?	4	I have been trying really hard time and trying to pass this time. I did a lot of self-studying on basically everything from the Basic coding, database Structure, connection, etc
Did I set and maintain high standards for myself?	4	I did my best and do with all my effort in this cycle. Although the end work may not be perfect, I have given all I can this cycle and this is the highest standard that I can deliver.
Did I spend enough time to do quality work?	4	Although I did not keep track of my time spent I have spent at least 3 hours a day reading and watching online material and coding every night
Did I regulate my procrastinations, distractions, and temptations in order to complete my work?	3	There was a time that when I was studying online material I got distracted by another video. Sometimes when I'm stuck with my coding, I will just sit there and shut down which was not helping with the code.
Did I make good use of available resources?	4	The material online and reading through some other projects online help to solve some of the issues and problems that I face during the coding.
Did I ask questions if I needed help?	2	I did ask for some help from my teammates but sometimes I rather do some research online and see if I can solve it, I will ask for help if I can't solve it.
Did I review, and re-review my work for possible errors?	3	I did review my work but I have always overlooked some of the errors or sometimes I just don't understand the error. On the other hand, there were errors such as I can end shift right away that I can not solve.
Did I examine best practices for similar work?	3	When I was doing research online, some applications Include some of the functions that I was doing such as a dropdown list.
Is my work something for which I am proud – that I would proudly show to a large global audience?	4	I can not be more proud of myself. Although my work may not be perfect, that is what I learn and do step by step to achieve it.

Section 3: Self-Improvement

Refer to your goals for improvement as described in your last self-review. Describe the activities you have undertaken to improve in this area.

I spend a lot more time on the project as I said in the last review but I was not setting up a timeline for myself this time because of a misunderstanding on my part. I kind of have to redo it in the process. Although I didn't set a timetable, I do my studying coding regularly so a timetable was not necessary.

As an overall summary of your experiences in ICT Project, please document your personal lessons learned – relate to the three ILOS of the unit.

This has been a tough year for me. I experienced changing groups, changing projects, and academic dishonesty. What I learn most in this project is no matter what happens, talk to the team and don't try to cheat in any way.

ILOS1
I have met most of the needs of the client in my start and end shift part.
There were a part that I was able to do is to end shift right away.

ILOS2
My design is base on the needs and feedback that I get from my client and the user testing.

ILOS3
I have conveyed a lot of capacity for self-learning. I may not be the best teammate but I have been trying hard to not drag my team down by doing my part. I was not adhering to codes of professional conduct throughout the software development process. I had a wrong decision with AGILE CYCLE 2 but I have done everything to try and fix and bring myself on the right track in AGILE CYCLE 3.
